

The Middle East Facility Management Association (MEFMA), is looking to create stronger ties and awareness among its members through its 'Member of the Month' program. The initiative highlights a chosen member and the contributions that they have made in the move to further promote the FM industry--including the member's initiatives, CSR activities and value additions offered to their customers.

MEMBER OF THE MONTH

Dubai Networking Event
December 13, 2017
Sponsored by FARNEK

Thank you for your active membership and continuous show of support for MEFMA programs and initiatives

JANUARY

Markus Oberlin, CEO, FARNEK

Innovation, along with a focus on smart technology and adoption of sustainable strategies must be priorities of FM professionals.

Expert Advice

Corporate Members since 2010

22 of Farnek employees have attended MEFMA Facility Management Courses.

CER

Certified Emission Reductions (CER) is a certificate that is issued when an organisation balances the equivalent of one tonne of carbon emissions through a registered carbon project. Carbon credit is a generic term for tradable certificates, used to mitigate the growth in concentration of greenhouse gases.

Farnek is proud to be the first company to purchase CERs from the maiden project generating carbon credits in the GCC. It also gives them the opportunity to support the efforts of the Dubai Government in creating an environmentally responsible economy.

Striving for Sustainability

Recently, Farnek took delivery of an electric car from Renault as they continue to strive for a more sustainable way of operating their business, especially their growing transportation fleet, which currently comprises over 200 vehicles.

Renault's ZOE electric model will help Farnek to reduce its carbon footprint by saving 17 tonnes (78 per cent) of carbon emissions annually, compared with any of the existing saloon cars in their fleet, that travel approximately 72,000 kilometres per year.
